 Online Math Games?
by M - Wednesday, 4 March 2009, 11:51 AM

Does anyone play online math games? There are tons of websites that have math games and some of them are pretty fun.

Well, I play sudoku online. But I don't really like to do other stuff that is made out of addition and other stuff like that.

Wow~ how often do you play it? I think sudoku origins from Japan. It was not that popular years ago. So it is quite amazing for me now to see so many people doing sudoku when taking the train. 😊

Someone told me this website- <http://labyrinth.thinkport.org>
You have to follow the hint on the given map to find the correct stage you should be in. Some of the games at here are pretty challenging and there is no instruction guild to tell you the rules. Have fun though! 😊

mathisfun.com has some fun games; and they let you play games on Math Is Fun that they don't let you play on other websites at school! There's a really fun game called tanks, but you have to play two player or else it's super easy.

www.multiplication.com/
www.timezattack.com/
www.mathfactcafe.com/
www.aplusmath.com/

play disco dino on the first site. It's funny!
