Acceptable screening tests for TB:
• PPD or Mantoux skin test,
• QuantiFERON®-TB Gold or T-SPOT®.

Physician must document results of screening. Was the result positive?

Since the date of the last test, has the student spent four consecutive weeks or longer (travel, school, work, residence, etc.) in any country NOT listed in Box A below?

CTY must be provided with the results of a chest x-ray (CXR).*

Since the date of the last test, has the student spent four consecutive weeks or longer (travel, school, work, residence, etc.) in any country NOT listed in Box A below?

CTY must be provided with the results of a chest x-ray (CXR).*

TB Testing and CXR* (if applicable) must be performed no more than 4 weeks prior to student’s arrival at CTY UNLESS the student will only be living or traveling in country listed in Box A when and after the testing/x-ray is obtained. If this applies to your student, testing must be performed no more than 6 months prior to the start of the program.

Box A: LIST OF COUNTRIES WHERE TB TEST IS NOT REQUIRED:
American Samoa, Albania, Andorra, Antigua, Australia, Austria, Bahamas, Barbados, Barbuda, Belgium, Bermuda, British V.I., Canada, Cayman Islands, Costa Rica, Cuba, Cyprus, Czech Republic, Denmark, Dominica, Finland, France, Germany, Greece, Grenada, Iceland, Ireland, Israel, Italy, Jamaica, Jordan, Lebanon, Luxembourg, Malta, Monaco, Montserrat, Netherlands, New Zealand, Norway, Oman, Puerto Rico, San Marino, St. Kitts & Nevis, St. Lucia, Slovakia, Slovenia, Spain, Sweden, Switzerland, United Arab Emirates, United Kingdom, U.S. Virgin Islands

*Only refer to this chart if the student requires TB Testing according to the TB Screening Chart (Diagram 1).
The student has received a BCG Vaccine. The student still must be screened for TB as the vaccine is not recognized in the US as providing immunity for TB. If testing is needed according to diagram 1, use this flow chart.

**Acceptable screening tests for TB:**

- PPD or Mantoux skin test,
- QuantiFERON®-TB Gold or
- T-SPOT®.

Be aware that the BCG Vaccine may cause a false positive result on the PPD or Mantoux skin test. Due to this, you may opt for the QuantiFERON®-TB Gold or T-SPOT® blood tests. Consult with your physician.

(If tested with the PPD or Mantoux skin test) Because of the chance of a false positive with a PPD or Mantoux skin test, the student can be re-tested with the QuantiFERON®-TB Gold or T-SPOT® blood tests or the child can get a chest x-ray (CXR). Will the child get a CXR?
