

## Part II. Math

The questions in this part measure how well you work with numbers.

Each question has two parts. One part is in Column A. The other part is in Column B. You must find out if one part is greater than the other, if the parts are equal, or if not enough information is given to decide. You will choose one answer.

- A. If the part in column A is greater.
- B. If the part in column B is greater.
- C. If the two parts are equal.
- D. Not enough information is given.

Try the example below now:

Column A

$$(2 \times 5) + 1$$

Column B

$$(2 \times 10) + 5$$

- A. Column A is greater.
- B. Column B is greater.
- C. The two parts are equal.
- D. Not enough information is given.

Now try this example:

Column A

Area of this triangle

Column B

Area of this triangle

- A. Column A is greater.
- B. Column B is greater.
- C. The two parts are equal.
- D. Not enough information is given.

Now try this example:

Column A

$$3^2 - 3$$

Column B

$$3 \times 2 - 3$$

- A. Column A is greater.
- B. Column B is greater.
- C. The two parts are equal.
- D. Not enough information is given.
